**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-39 and 41-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Nielsen, U.S. Patent No. 4,169,736 (hereinafter "Nielsen"). The claims are examined in the broadest light possible. Nielsen teaches an improving additive for cement and related masses based on an inorganic binder (e.g., lime) comprising an alkali extract of lingo-cellulosic materials, the extract being modified with a fatty acid or an oily ester (the alkali extract modified with fatty acid corresponds to a monovalent cation salt of a carboxylic acid). See Nielsen, Abstract; col. 1, line 62 through col. 2, line 2. The alkali extract modified with fatty acid has varying amounts as additives to the cement or lime grout. See Nielsen, col. 2, line 30-68. Nielsen also teaches the addition of a synthetic

binder such as a polyacrylate. See Nielsen, col. 3, lines 50-68.

3. Claim 40 is objected to for depending on a rejected base claim.
